AMENDMENTS TO THE CLAIMS

1.   (Currently amended)   A method for selecting fashion information for an individual comprising the steps of:

providing a style database including complimentary fashion information having cosmetic data and physical characteristic data;

providing a personal characteristic database adapted to receive physical characteristic data for an individual;

providing an input device operable to capture an image of the individual, the image comprising data of at least two physical characteristics data about the individual;

capturing with the input device an image of the individual comprising data for at least two physical characteristics data of the individual;

receiving in the personal characteristic database physical characteristic data for at least two physical characteristics for the individual;

comparing said physical characteristic data for the individual with the style database to identify complimentary fashion selections that are appropriate for the individual based upon the physical characteristic data received in the personal characteristic database; and

generating a hard copy of a data set that includes complimentary fashion selections that are appropriate for the individual based upon the physical characteristic data received in the personal characteristic database.

2.   (Original) The method of claim 1, wherein said style database further comprises instructional data concerning the proper application of cosmetics.

3.   (Original) The method of claim 2, wherein said instructional data comprises a multimedia presentation.

4.   (Previously presented) The method of claim 3, wherein said multimedia presentation comprises a video presentation.

5.   (Original) The method of claim 1, wherein said cosmetic data comprises at least one cosmetic characteristic selected from a group consisting of: cosmetic brand, cosmetic style, colors, textures, medicinal qualities or chemical qualities.

6.   (Previously presented) The method of claim 1, wherein said physical characteristic data is selected from a group consisting of: skin color, skin tone, hair color, eye color, facial shape, body proportions, body measurements.

7.   (Original) The method of claim 1, wherein said input device comprises a digital camera.

8.   (Previously presented) The method of claim 1, wherein said input device comprises a colorimeter.

9.   (Previously presented)   The method of claim 1, wherein said input device comprises a spectrophotometer.

10.   (Original)   The method of claim 1, wherein said input device comprises a computer.

11.   (Original)   The method of claim 1, wherein said style database further comprises footwear information.

12.   (Original)   The method of claim 1, wherein said style database further comprises clothing information.

13.   (Previously presented)   The method of claim 12, wherein said clothing information includes clothing data selected from a group consisting of: size data, style data, fabric color data and fabric texture data.

14.   (Previously presented)   The method of claim 1, wherein said personal characteristic database is accessible via a computer network.

15.   (Canceled)

16.   (Currently amended)   A method for providing fashion information for an individual, said method comprising the steps of:

providing a style database having complimentary fashion information;

providing a personal characteristic database being adapted to receive physical characteristic data for an individual;

providing an input device operable to capture an image of the individual, the image comprising data of at least two physical characteristics data about the individual;

capturing with the input device an image of the individual comprising data for at least two physical characteristics data of the individual;

receiving in the personal characteristic database physical characteristic data for at least two physical characteristics for an individual;

comparing said physical characteristic data for the individual with said style database to identify appropriate fashion selections for the individual based upon the at least two physical characteristics communicated to the personal characteristic database; and

generating a printout data set that includes fashion selections that are appropriate for the individual based upon the at least two physical characteristics communicated to the personal characteristic database.

17.   (Previously presented) The method of claim 16, wherein the at least two physical characteristics are selected from a group consisting of: skin color, skin tone, hair color, eye color, facial shape, body proportions, body measurements.

18.   (Previously presented)   The method of claim 16, wherein the complimentary fashion information comprises clothing information.

19.   (Previously presented)   The method of claim 18, wherein the clothing information is selected from a group consisting of: clothing size, clothing style, clothing fabric color and clothing fabric texture.

20.   (Previously presented)   The method of claim 16, wherein the complimentary fashion information comprises cosmetic data.

21.   (Previously presented)   The method of claim 19, wherein the complimentary fashion information comprises footwear information.

22.   (Previously presented)   The method of claim 19, wherein said fashion selections are selected from the group consisting of: cosmetic information, clothing information and footwear information.

23.   (Previously presented)   The method of claim 16, wherein said input device comprises a camera.

24.   (Previously presented)   The method of claim 16, wherein said input device comprises an colorimeter.

25.   (Previously presented)   The method of claim 16, wherein said input device comprises a spectrophotometer.

26.   (Previously presented)   The method of claim 16, wherein said input device comprises a computer.

27.   (Currently amended)   A method for selecting fashion information for an individual comprising the steps of:

providing a style database including complimentary fashion information having cosmetic data and physical characteristic data;

providing a personal characteristic database adapted to receive physical characteristic data for an individual;

providing an input device operable to capture an image of the individual comprising data of at least two physical characteristics about the individual;

receiving in the style database from the input device an image of the individual having physical characteristic data for two physical characteristics for the individual;

receiving in the style database a requested result for the individual;

comparing in the style database the physical characteristic data for the individual with the requested result to identify complimentary fashion selections that achieve the requested result for the individual based upon the received physical characteristic data; and

generating a data set sheet that includes complimentary fashion selections that achieve

the requested result for the individual based upon the received physical characteristic data.

28.   (Previously presented)   The method of claim 27, wherein the complimentary

fashion information comprises clothing information.

29.   (Previously presented)   The method of claim 28, wherein the clothing information

is selected from a group consisting of: clothing size, clothing style, clothing fabric color and

clothing fabric texture.

30.   (Previously presented)   The method of claim 29, wherein the complimentary

fashion information comprises cosmetic data.

31.   (Previously presented)   The method of claim 29, wherein the complimentary

fashion information comprises footwear information.

32.   (Previously presented)   The method of claim 27, wherein said fashion selections

are selected from the group consisting of: cosmetic information, clothing information and

footwear information.

33.   (Currently amended)   A method for selecting fashion information for an

individual comprising the steps of:

providing a style database including complimentary fashion information;

providing a personal characteristic database adapted to receive physical characteristic data for an individual;

providing an input device operable to capture physical characteristic data about the individual;

capturing an image of the individual with the input device, the image including ~~physical characteristic~~ data for at least two physical characteristics of the individual;

receiving in the personal characteristic database the image captured by the input device ~~physical characteristic data for at least two physical characteristics for the individual~~;

receiving in the style database a requested result for the individual;

comparing said physical characteristic data from the image of the individual ~~for the individual~~ with the style database to identify complimentary fashion selections that achieve the requested result for the individual based upon the physical characteristic data received in the personal characteristic database; and

generating a data set booklet for the individual that includes complimentary fashion selections that achieve the requested result for the individual based upon the physical characteristic data received in the personal characteristic database.

34.   (Previously presented) The method of claim 33, wherein the at least two physical characteristics are selected from a group consisting of: skin color, skin tone, hair color, eye color, facial shape, body proportions, body measurements.

35.   (Previously presented)   The method of claim 33, wherein the complimentary fashion information comprises clothing information.

36.   (Previously presented)   The method of claim 35, wherein the clothing information is selected from a group consisting of: clothing size, clothing style, clothing fabric color and clothing fabric texture.

37.   (Previously presented)   The method of claim 33, wherein the complimentary fashion information comprises cosmetic data.

38.   (Previously presented)   The method of claim 37, wherein the complimentary fashion information comprises footwear information.

39.   (Previously presented)   The method of claim 37, wherein said fashion selections are selected from the group consisting of: cosmetic information, clothing information and footwear information.

40.   (Previously presented)   The method of claim 33, wherein said input device comprises a camera.

41.   (Previously presented)   The method of claim 33, wherein said input device comprises a colorimeter.

42.   (Previously presented)   The method of claim 33, wherein said input device comprises a spectrophotometer.

43.   (Previously presented)   The method of claim 33, wherein said input device comprises a computer.
